### Construction Features DN50(2") to DN300(12")

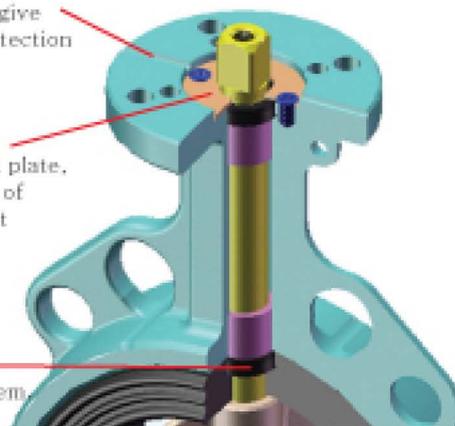

- Stainless steel plate, ensures proof of stem blow-out
- V-type ring, provides a weather seal
- PTFE + graphite bearing, ensures perfect turning and centric positioning of the stem. The sleeve bearing provides excellent support even if actuator are used for automation purposes.
- V-type ring, provides a secondary sealing, preventing leakage by any chance from the stem.
- Pinless connection, no leakage between disc and shaft.
- Disc with two-piece shaft construction, enhance the flow capacity of the valve. The shape of the disc provides lower torque and prolongs the life span of the valve.
- Unique wave line rubber seat, reduces the torque of the valve and enhances the life time of the sealing.
- Seat vulcanized to hard back, ideal for vacuum applications and mounting between flanges becomes easily done.
- Multi-standard alignment holes, Suitable for flange of EN1092 PN10, PN16, ASME CLASS125/150, BS10 TABLE D, TABLE E and JIS B2239 10K,16K

■ Unique hole for hang of Manual book

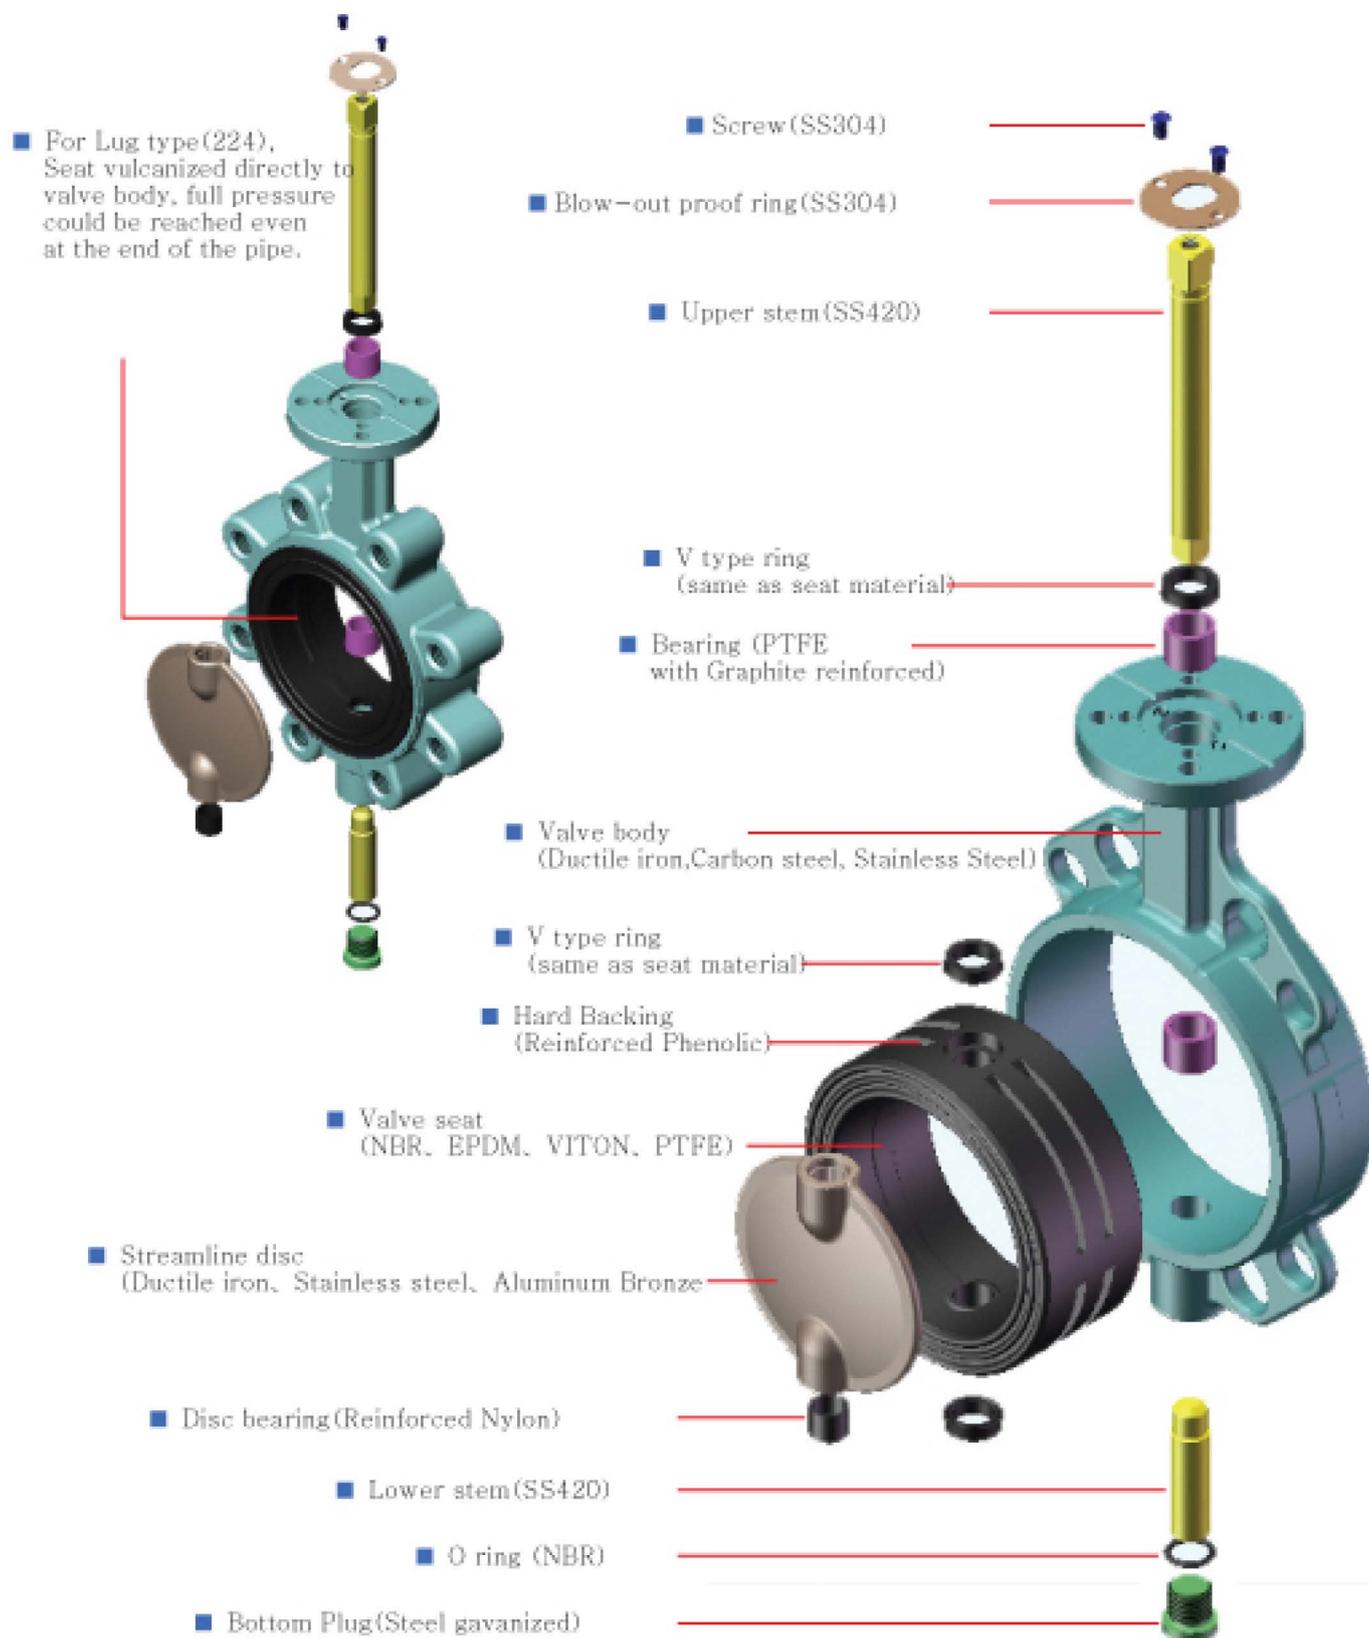

- Thread holes could be drilled according to requirements
- For Lug type (224), Seat vulcanized to valve body, full pressure could be reached even at the end of the pipe.

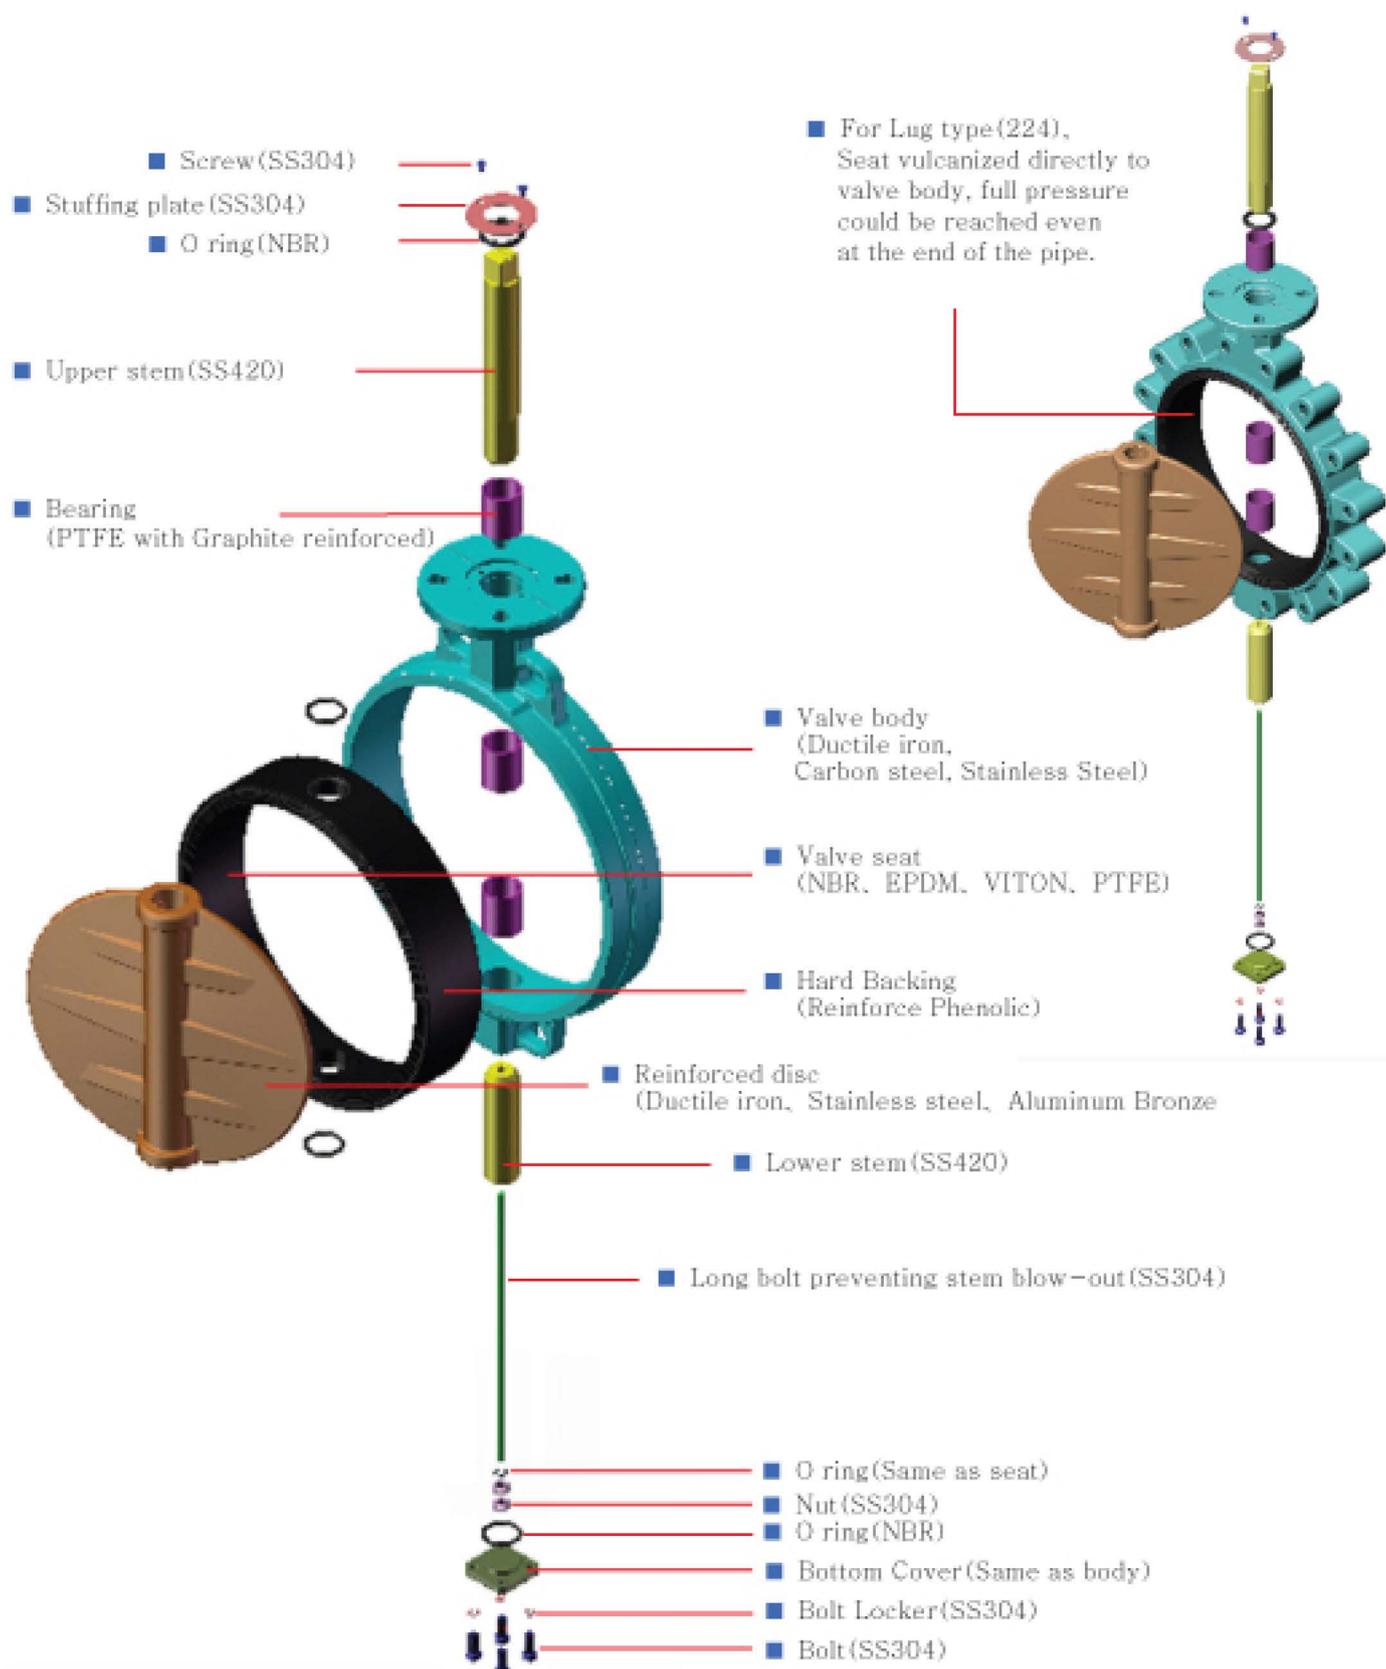

- Unique groove getting rid of wetness, give a very good protection to actuators
- Stainless steel plate, ensures proof of stem blow-out
- V-type ring, provides a secondary sealing, preventing leakage by any chance from the stem

### Valve parts DN50(2") to DN300(12")

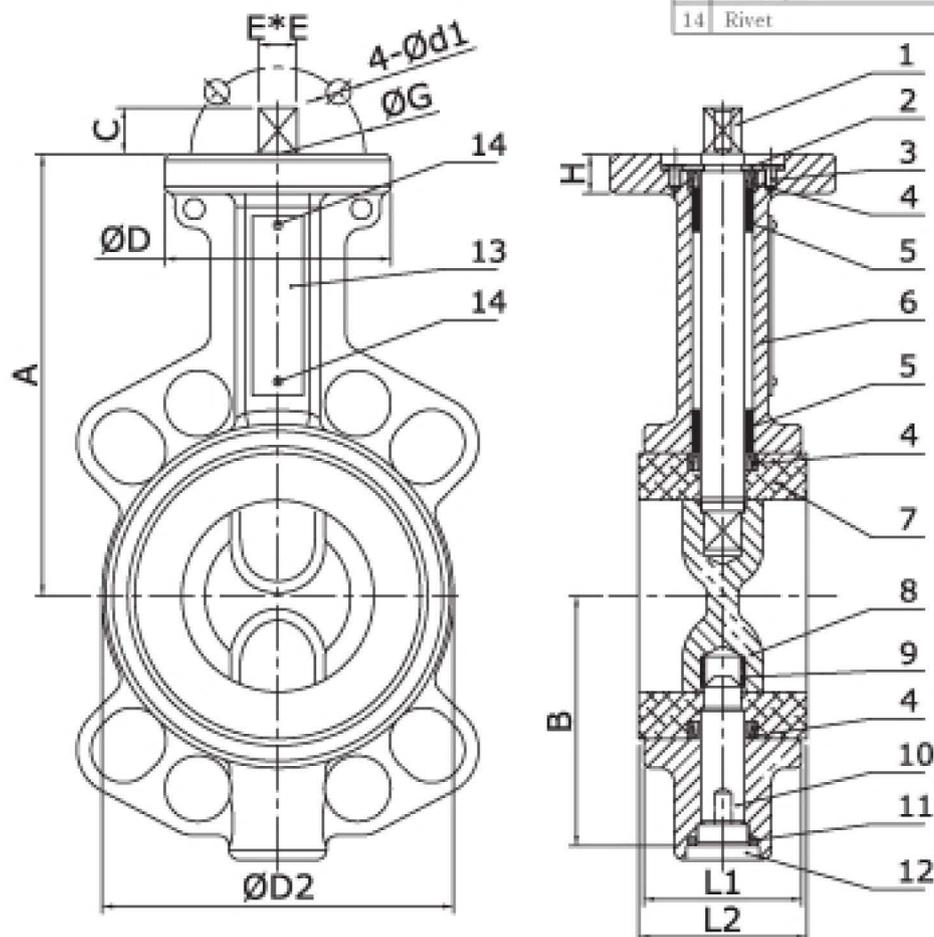

Valve parts DN350(14") to DN1400(56")

## Dimensions of 223 Valve DN50(2") to DN300(12")

| SIZE  | A   | B     | C    | E*E   | D   | D2    | G     | d1  | H  | L1 | L2   |

| DN250 | 266 | 213   | 24.5 | 22*22 | 125 | 324.2 | 102   | 11  | 15 | 68 | 72.4 |
| DN300 | 291 | 242   | 26.5 | 27*27 | 150 | 376.8 | 125   | 13  | 15 | 78 | 81.5 |

| No. | Part Name       | Standard Material        |
|-----|-----------------|--------------------------|
| 1   | Upper stem      | SS420                    |
| 2   | Preventing ring | SS304                    |
| 3   | Screw           | SS304                    |
| 4   | V type ring     | Same as seat             |
| 5   | Bearing         | PTFE Graphite reinforced |
| 6   | Body            | GGG40                    |
| 7   | Seat            | NBR, EPDM, VITON, PTFE   |
| 8   | Disc            | SS316                    |
| 9   | Disc bearing    | Nylon Reinforced         |
| 10  | Lower stem      | SS420                    |
| 11  | O ring          | NBR                      |
| 12  | Plug            | Steel Zinc-plated        |
| 13  | Name plate      | SS304                    |
| 14  | Rivet           | Copper                   |

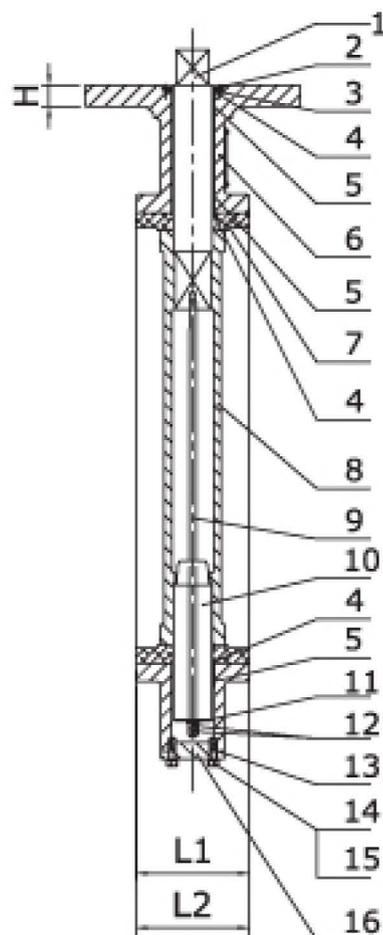

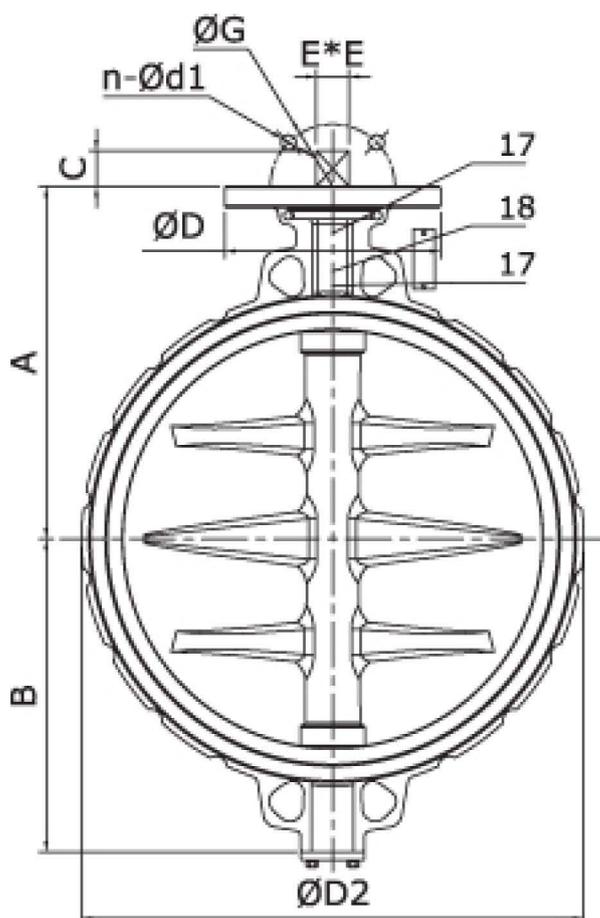

1. Valve design complies with API609, MSS SP-67, BS5155 and EN593 ;
2. Valve face to face conform to EN558 basic series 20(wafer short) and API609 ;
3. Valve inspection according to API598 ;
4. Top flange compatible with ISO5211, actuator can be mounted parallel or perpendicular to the pipe line ;
5. Suitable between flanges : EN1092 PN10, PN16 . ANSI B16.1 CLASS125, ANSI B16.5 CLASS150 ,  
BS10 TABLE D, TABLE E . JIS B2239 10K, 16K.
6. Valves meet the intent of and have passed AWWA C504-87 Section 5 proof of design tests.

## Dimensions of 223 Valve DN350(14") to DN1400(56")

| SIZE  | A   | B     | C  | E*E   | D   | D2    | G       | n   | d1    | H  | L1  | L2    |

1. Valve design complies with API609, MSS SP-67, BS5155 and EN593 ;
2. Valve face to face conform to EN558 basic series 13 (Double flanged short) ;
3. Valve inspection according to API598 ;
4. Top flange compatible with ISO5211, actuator can be mounted parallel or perpendicular to the pipe line ;
5. Suitable between flanges : EN1092 PN10 or PN16 , or ANSI B16.1 CLASS125, ANSI B16.5 CLASS150.
6. Valves meet the intent of and have passed AWWA C504-87 Section 5 proof of design tests.

### Dimensions of 240 Valve DN350(14") to DN1400(56")

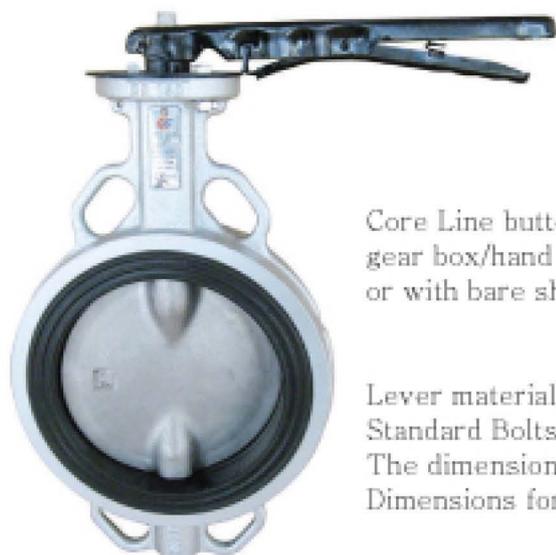

Dimensions of DN700(28" ) to DN1400(56" ) please contact with our technical department if you need.

6. Valves meet the intent of and have passed AWWA C504-87 Section 5 proof of design tests.

### Dimensions of Handlever operator

Core Line butterfly valves can be supplied for operation by lever, gear box/hand wheel, pneumatic or electric actuator, or with bare shaft for fitting with customer' s own operating mechanism.

Lever material could be steel by e-coating, Aluminum Alloy or stainless steel. Standard Bolts and nuts for the lever are SS304. The dimensions valid for type 223 and 224 Steel and SS lever. Dimensions for Aluminum Please contact with us when needed.

### Dimensions of DN50-DN300 Gear box operator

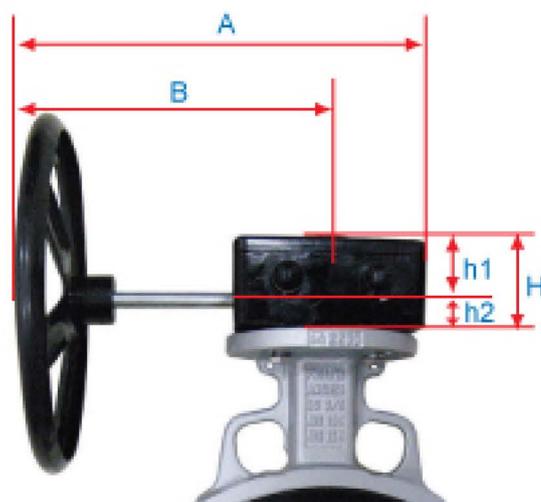

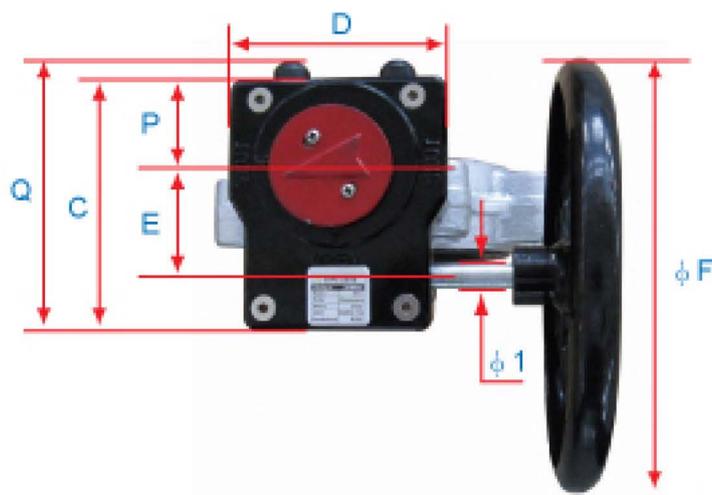

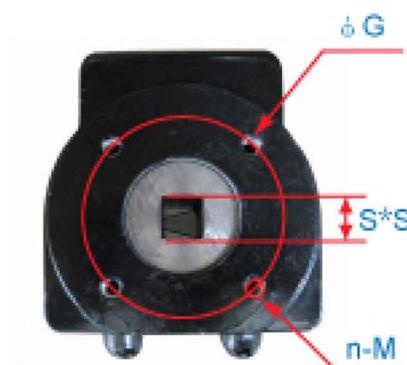

Aluminum alloy housing, steel input shaft & worm gear, ductile iron output gear segment. The enclosure is weatherproof and units are normally provided with a handwheel.

Adjustable end of travel stops are standard and factory set when the gearbox is factory mounted.

Standard Bolts and nuts for the gearbox are SS304.

The dimensions is valid for 223 and 224 series valves.

All torque values shown on the chart are for "wet" (water and other non-lubricating media) on-off service. For "dry" service (non-lubricating, dry gas media), multiply the above torques by 1.25. Under certain conditions, hydrodynamic torque can meet or exceed seating and unseating torques. When designing Valve systems hydrodynamic torque must be considered to help ensure correct

### Kv values - valve sizing Coefficients (M<sup>3</sup>/H AT 1BAR Δ P)
